

INDEX

- Adaptive AI, 63–64
- Adaptive learning systems, 13
- Adopting statistical learning, 2
- Agentic AI, 3
- Agentic systems, 26–28
- Artificial agents, 1
- Artificial general intelligence, 67
- Artificial intelligence (AI), 1, 3, 7, 12, 19, 31, 51, 63
 - academic perceptions of, 12–13
 - assessing AI literacy in education, 58–60
 - assessing human-only capabilities in AI era, 55–57
 - assessing human–AI performance, 57–58
 - catching cheaters to designing for synthetic intelligence, 53–54
 - in dialogue, 17–18
 - dimensions of learning
 - assessment in AI era, 54–55
 - implications for assessment
 - literacy, policy, and research, 61–62
 - implications for learning, 16–17
 - limits of, 14–15
 - strengths of, 13–14
 - stress-testing traditional assessment in age of generative AI, 52–53
 - traditional assessment, 51–52
 - traditional assessments still relevant, 60–61
- Artificial Intelligence in Education* (AIED), 13
- Assessment redesign, 54
- Behaviorism, 19–21
- Behaviorist, 20
- Big ideas, 21
- Black boxes, 15
- “Body-syntonic” reasoning, 24
- Built intelligent systems, 2
- Cattell–Horn–Carroll model, 8
- Chain-of-thought prompting, 39, 42
- Chalkboards, 19–21
- ChatGPT, 15, 43, 52
- ChatGPT Edu, 49
- Classrooms, 12
 - teacher–AI co-orchestration in, 46–48
- Co-designing assessment systems, 61
- Co-representation, 35, 45
- Cognitive load theory, 10
- Cognitive psychology, 10
- Cognitive tutors, 22
- Cognitivism, 19, 21–23
- Cognitivist learning theory, 21–22
- Communication, 56–57
- Computer supported collaborative learning (CSCL), 25–26

- Computer-Supported Intentional Learning Environment, 24
- Connectivism, 19, 25–26
- Connectivist, 25
- Constructionism, 23–25
- Constructionist environments, 24
- Constructivism, 19, 23–25, 27
- Constructivist learning theory, 26
- Contemporary tools, 14
- Contextual priming and linguistic clarity, 39, 42
- Conversational AI mentors, 69
- Conversational framework, 33
- Critical thinking and judgment, 55–56
- Crystallized intelligence, 8–9
- Cultivate conversations, 44

- Decision-making with AI support, 57
- Deep learning, 13
- Design educational systems, 18
- Dialogic pedagogy, 35
- Dialogic synthetic intelligence in practice, 44
 - Google Gemini’s guided learning, 44–45
 - OpenAI ChatGPT’s study mode, 45–46
 - risks and failure modes, 48–49
 - teacher–AI co-orchestration in classrooms, 46–48
- Dialogic theories, 33
- Dialogue, 33, 43
 - arts and science of, 37
 - as engine of synthetic intelligence, 32–33
 - prompting approach, 37–40
 - Socratic inquiry, 40–44
- Drill-and practice systems, 21

- Education, 4, 7, 13, 64
 - assessing AI literacy in, 58–60
 - research and practice agenda for synthetic intelligence in, 70–71
 - synthetic intelligence in, 4
- Educational design, 68
- Educational responsibility, 68
- Educational technologies, 22
- Educational terms, 65
- Educational theorists, 32
- Educators, 43, 59, 66–67
- Elenchus*, 32
- Embodied intelligence, 3
- Empathy, 56–57

- Fluid intelligence, 8
- Flynn effect, 10–11

- Gemini, 49
- General-purpose technology, 13
- Generative AI, 3, 13–16, 26–28, 51, 55, 60, 62
 - stress-testing traditional assessment in age of, 52–53
- Generative exploration, 35, 45
- Generative models, 15
- Google, 44, 46
- Google Gemini’s guided learning, 44–45
- Governance, 36

- Higher education, 16, 59
- Human
 - agents, 1
 - capacity, 7, 13
 - cognition, 17
 - communication, 56
 - human–human dialogue, 34

- human–human interaction, 70
- interlocutors, 33
- learners, 10
- tutoring, 43
- Human intelligence, 2, 4, 7, 10–12
 - academic perceptions of, 7–9
 - in dialogue, 17–18
 - limits of, 10–11
 - strengths of, 9–10
- Human-only capabilities in AI era, 55
 - communication and empathy 56–57
 - creativity and original insight, 56
 - critical thinking and judgment, 55–56
 - ethical reasoning, 56
- Human–AI
 - assessing human–AI performance, 57–58
 - conversations, 43
 - dialogue, 31, 33, 41
 - partnerships, 5
- Humanism, 67–68
- Humanist superintelligence, 3
- Humanity, 1
- Hypermedia environments, 22

- Ideal student model, 23
- Institutional guidance, 54
- Institutions, 64
- Intelligence, 1, 7–8
 - brief history of, 2–4
 - research, 12
 - test scores, 11
- Intelligent tutoring systems (ITSs), 13
- Intentional framing, 34, 45
- Internet, 25
- Interpsychological plane, 32

- K–12
 - education, 58
 - systems, 16
- Knowledge
 - construction, 27
 - knowledge-tracing models, 14
- Language learning, 66
- Large language models, 4, 13, 51, 59, 63
- Learners, 11–12
- Learning, 10, 19, 27–28
 - implications for, 11–12, 16–17
 - process, 66
- Learning assessment, 54
 - dimensions in AI era, 54–55
- Learning ecologies, 25–26
 - perspectives, 25
- Learning theory, 5, 19
 - behaviorism, 19–21
 - cognitivism, 21–23
 - connectivism and web era, 25–26
 - constructivism and constructionism, 23–25
 - posthumanist constructivism, 26–28
- Logo programming language, 24

- Machine intelligence, 4
- Machine learning models, 1, 14
- Massive open online courses (MOOCs), 25–26
- Meta-analytic work, 21
- Meta-cognitive use of AI, 57
- Meta-dialogue, 36, 45–46
- Meta-prompting, 40
- Microsoft AI, 3
- Mindtools, 24

- Multimedia
 - environments, 22
 - learning, 22
- Multiple intelligences, 8
- Multivoicedness, 35, 45

- Natural language processing, 1
- Networked environments, 24
- Networked perspectives, 25
- Networks, 25–26
- Neural networks, 1–2

- OpenAI, 44, 46, 63
 - ChatGPT’s study mode, 45–46
- Optimism, 2
- Over-reliance on AI, 58

- Performance-based assessments, 59
- Personalization, 16
- Policy frameworks, 61
- Posthumanist constructivism, 26–28, 66
- Posthumanist constructivist learning theory, 27
- Posthumanist learning theory, 26
- Posthumanist theorists, 67
- Posthumanist theory, 27
- Problem-solving tasks, 17
- Process transparency, 70
- Programmed instruction, 19–21
- Prompt design and judgment, 57
- Prompting approach, 37–40
- Psychology, 7

- Reflection, 36
- Reflective use of AI, 57
- Relationship, 31

- Self-Adapting Language Models (SEAL), 64
- Self-learning AI, 63–64

- Self-reflection prompting, 40
- Social media, 25
- Socioconstructivist theories, 33
- Sociocultural theories, 10
- Socratic inquiry, 40–44
- Spatial intelligence, 3
- Spatially grounded intelligence,
 - wordsmiths in dark to, 65–67
- Sternberg’s triarchic theory, 8
- Stress-testing traditional assessment
 - in age of generative AI, 52–53
- Structured prompting, 38, 40
- Students, 12, 41, 58
- Superintelligence, 67–68
- Sustainable assessment, 52
- Synthetic assessment, 70
 - ecosystems, 69
- Synthetic classrooms, 70
 - imagining synthetic classrooms and universities, 68–70
- Synthetic dawn
 - from minds in wild to minds with machines, 2–4
 - organized, 5
 - synthetic intelligence, 4
 - synthetic intelligence in education, 4
- Synthetic epistemology, 70
- Synthetic intelligence, 4, 7, 27, 31, 43, 49, 51–52, 54, 58, 61, 64, 71
 - art and science of dialogue, 37–44
 - catching cheaters to designing for, 53–54
 - classroom, 46
 - components of dialogic framework for, 33–37

- context, 38
- designing conversations worth, 49–50
- dialogic synthetic intelligence in practice, 44–49
- dialogue as engine of, 32–33
- in education, 4
- research and practice agenda for synthetic intelligence in education, 70–71
- Synthetic learning ecologies, 26–28
- Synthetic pedagogy, 70
- Synthetic university, 68–69
- System-level signals, 53
- Teacher(s), 36
 - teacher–AI co-orchestration in classrooms, 46–48
 - training programs, 59
- Teaching, 21
 - machines, 19–21
 - for unfinished worlds, 71
- Technology, 19, 25–26
 - of teaching, 21
- Transparency, 58
- Web era, 25–26
- Working-memory capacity, 10
- World models, 65
 - world-model-based labs, 69
